## SUMMARY

Passionate Computer Science & Engineering student with practical exposure to web development and adept in the web development stack. Recent impactful internship refined skills, actively pursuing a software engineering role to contribute project-based expertise and elevate domain-specific skills. Committed to applying knowledge for the continual advancement of the institution.

## SKILLS

**Languages** : Java, JavaScript, ES6, C, Node JS, TypeScript, Python.

**Interface** : HTML, CSS.

**Frameworks** : Bootstrap, Tailwind CSS, ReactJS, Express, Next.js, AngularJS.

**Database** : MongoDB.

**Tools** : Postman, Vercel, Netlify, Rapid API, Git, GitHub, Visual Studio Code, WordPress.

## EDUCATION

**Bachelor's of Engineering – Computer Science & Engineering**

2021-Present

CGPA:8.75

Mangalore Institute of Technology & Engineering

**Karkala Jnanasudha PU College (12th) - KSEEB**

2020-2021

Percentage:86%

**Madhava Kripa English Nursery & Higher Primary School  
(SSLC) - CBSE**

2018-2019

Percentage:77.7%

## INTERNSHIP

**Saara IT Solutions, Karkala**

**November 27 - December 25, 2023**

**Project** : E-Commerce Application

**Technologies** : MERN Stack (MongoDB, Express, React, Node JS), Redux.

- Led backend development, focusing on user authentication, product catalog, and order processing.
- Implemented Redux for frontend global state management, enhancing user interface responsiveness.
- Received positive user reviews for the prototype, reflecting successful team collaboration and improved user experience.

## PROJECTS

**Todo App using Next.js 14 | Solo**

**December 2023-January 2024**

**Technologies** : Next.js 14, MongoDB, Context API.

- Implemented JWT authentication and real-time data fetching for heightened security and dynamic user experiences.
- Designed a user-friendly UI with Context API for seamless task management, all backed by MongoDB Atlas for scalable cloud-based data storage.

**Blog App using MERN | Solo**

**July 2023-August 2023**

**Technologies** : ReactJS Node JS, Express, MongoDB, TailwindCSS.

- Utilized Cloudinary for efficient image storage and management.
- JWT for secure authentication using tokens.
- Optimized performance with the use of WEBP images.
- Employed Redux for effective global state management.

**Movie App using TMDB API | Solo**

**January 2023-February 2023**

**Technologies used:** ReactJS, Bootstrap, TMDB API, Netlify.

- Leveraged Axios for smooth and efficient data fetching.

- Implemented AOS (Animate on Scroll) for a rich and seamless user experience.
- Integrated TMDB API for real-time retrieval of movies and TV shows data.

## COURSES & WORKSHOPS

- **React Hands On session**, Mangalore Institute of Technology & Engineering, 2023.
- **JavaScript Ultimate Guide**, Josh Werner, Udemy.
- **HTML and CSS Basics to Advanced**, Stephen Koel Soren, Udemy.
- **Java Basics to Expert**, IBM, Great Learning.
- **Java Spring, Gradle Hands-on session**, Mangalore Institute of Technology & Engineering, 2023.

## ACHIEVEMENTS & ACTIVITIES

- Participated in Flipkart GRID 5.0 ,2023
- Won first place at UIWARS Hackathon held at MITE on 13 Jan, 2024.
- Won seventh place at Hack Heist Capture the flag, held at MITE on 20 Jan, 2024.

## HOBBIES

- Exploring new things
- Blogging
- Volunteer work
- Sketching
- Hiking
- Fitness and Wellness
